

NEERAJ PRAKASH

AI Product Manager | Data & Analytics Strategy | GenAI | Certified Scrum Master

neevibe27@gmail.com | +91-7073622877 | [linkedin.com/in/neerajprakash27](https://www.linkedin.com/in/neerajprakash27) | Bengaluru, Karnataka

PROFESSIONAL SUMMARY

Results-driven AI Product Manager with 10+ years of experience building data-driven products and AI/ML-powered solutions across airports, fintech, SaaS, and e-commerce. Proven track record of launching 5+ products that delivered 27% revenue growth and 24% improvement in customer retention. Has built products from scratch - including EKO (enterprise GenAI analytics platform) and Orbit PM (internal project management tool) - owning the full product lifecycle from ideation to deployment. Deep expertise in GenAI, LLM integration, product roadmap execution, Agile/Scrum, and cross-functional stakeholder management. Adept at translating complex AI capabilities into business outcomes, with hands-on experience deploying enterprise AI platforms and predictive analytics at scale.

CORE COMPETENCIES & TECHNICAL SKILLS

- **AI / ML:** Generative AI (GenAI), LLMs, Prompt Engineering, Predictive Analytics, Prescriptive Analytics, ML Algorithms, AI-Powered Decision Making
- **Product Management:** Product Strategy & Roadmap, Agile & Scrum Methodologies, Sprint Planning, User Story Creation, Backlog Prioritization, A/B Testing, Feature Delivery, Product Lifecycle Management
- **Data & Analytics:** Business Intelligence (BI), Data Modelling, ETL Processes, KPI Development & Optimization, Data Governance, SQL, PL/SQL
- **Cloud & Tools:** AWS, Microsoft Azure, Power BI, Tableau, Python, Jira, Hadoop, Microsoft SQL Server, MySQL, Excel
- **Leadership:** Cross-Functional Team Leadership, Stakeholder Management, Data-Driven Decision Making, Customer Experience & Retention, Cost Optimization
- **Certifications:** Certified Scrum Master (CSM)

WORK EXPERIENCE

Senior Manager - Corporate Strategy & AI Products

Jan 2023 - Present

Bangalore International Airport Ltd. (BIAL)

- Conceptualised, built, and deployed EKO - an enterprise GenAI-powered analytics platform (internal ChatGPT), integrating LLMs to automate BI reporting, enhance real-time decision-making, and reduce manual analytics effort.
- Defined product vision, roadmap, and KPIs for AI-driven airport operations tools; partnered with engineering, operations, and IT stakeholders to execute Agile sprints and deliver features on schedule.
- Designed AI-powered operational dashboards for passenger flow management, improving operational efficiency by 9% through data-driven process optimisation.
- Implemented personalised, data-driven passenger service strategies, increasing passenger satisfaction scores by 13%.
- Led AI and analytics integration across finance, operations, and IT, driving cost optimisation initiatives that reduced operational expenses by 7%.
- Established enterprise-wide data governance frameworks and KPI monitoring systems for airport operations, product adoption, and financial performance tracking.
- Built Orbit PM from scratch - a lightweight internal project management tool - owning the full product lifecycle from requirements gathering, wireframing, and sprint planning to feature development and stakeholder rollout, enabling teams to track tasks, deadlines, and delivery milestones in a single workflow.

Senior Business Analyst - AI Analytics Products

Oct 2021 - Jan 2023

Bidgely

- Led analytics-driven product enhancements for a SaaS AI platform, driving adoption across 3,000+ enterprise users across utility clients.

- Designed executive dashboards and reports that directly informed product roadmap prioritisation and revenue growth strategies.
- Collaborated with engineering and data science teams to define requirements and ship AI-driven analytics features, improving customer engagement KPIs.
- Delivered data-driven product marketing insights, optimising go-to-market strategies and sales performance for AI product lines.

Business Analyst - Product & Data

May 2019 - Sep 2021

Micro Technoid India

- Gathered and documented product requirements, bridging stakeholder needs with technical delivery across cross-functional teams.
- Optimised product roadmap using data insights, accelerating feature delivery velocity by 5% through backlog refinement.
- Designed and executed A/B testing programmes and user analytics workflows, boosting product adoption by 33%.
- Integrated predictive analytics models into the product stack, enhancing proactive customer engagement and reducing churn.
- Leveraged Tableau, Power BI, and SQL to develop data visualisations that improved product decision-making quality.

Data Analyst

Jan 2017 - May 2019

Amazon

- Developed and automated BI dashboards used by cross-functional teams for data-driven decision-making at scale.
- Built predictive models for customer behaviour analysis, optimising marketing campaigns and retention strategies.
- Translated complex datasets into actionable product and business insights, enabling faster strategic decision-making by leadership.
- Delivered deep-dive analytics for senior leadership, supporting data-backed pivots on product and business growth strategy.

Assistant Manager - Digital Banking Products

Sep 2014 - Dec 2016

Axis Bank

- Led digital banking product adoption initiatives, boosting customer engagement through data-driven targeting strategies.
- Optimised sales and revenue strategies using analytics-driven customer segmentation and precision targeting.
- Monitored financial KPIs and customer satisfaction metrics, ensuring product profitability and service quality.
- Developed cross-functional collaboration frameworks to improve service delivery and operational efficiency.

PROJECTS

A/B Experimentation and Conversion Funnel Evaluation | SQL | Python | Power BI Jan 2026 - Feb 2026

- Constructed a controlled experiment analysing behavioral activity from 20,000 user sessions by developing SQL pipelines using common table expressions, staged aggregations, event mapping & conversion tracking across sequential interaction stages.
- Investigated engagement characteristics through window function calculations and user-level summarization techniques evaluating conversion movement, transaction values, retention signals & revenue generation differences between variants.
- Performed statistical validation using Python analytical libraries by executing two-proportion hypothesis testing across segmented user groups, producing evidence-based interpretation supporting data-driven product design decisions.
- Developed a Power BI reporting environment presenting 15 operational metrics including funnel progression stages, behavioral transitions, revenue & variant performance insights enabling leadership teams to evaluate experiment outcomes clearly.

B2B Sales Intelligence and Customer Behavior Dashboard | Tableau Dec 2024 - Feb 2025

- Created an interactive Tableau analytical interface consolidating three operational datasets covering orders, revenue streams, profit indicators & client purchasing activity to support business performance evaluation across product portfolios.
- Examined historical sales transactions exceeding 5,000 order records to identify declining product categories, uncover demand trends, and highlight ten high-value enterprise clients requiring dedicated relationship management strategies.

E-commerce Customer Segmentation (RFM Analysis) | DimensionLabsApr 2024 - Jul 2024

- Conducted Recency Frequency Monetary modelling across 8,000 ecommerce transactions to categorize consumers into behavioral segments supporting marketing prioritization strategies & targeted promotions for high-value customer groups.
- Prepared analytical datasets by performing preprocessing procedures including duplicate elimination, feature construction, missing value treatment, and transaction aggregation using SQL scripts, Python dataframes, and spreadsheet transformation logic.
- Generated behavioral insights by evaluating purchasing frequency patterns, monetary value distributions, and recency indicators across customer clusters enabling campaign planners to prioritize retention and reactivation initiatives.

KEY ACHIEVEMENTS

- Launched EKO, a GenAI enterprise platform, from concept to deployment - driving automation of analytics reporting for airport-wide decision-making.
- Successfully launched 5+ products across domains, resulting in 27% revenue growth, 24% improvement in customer retention, and 5% faster feature delivery.
- Drove 13% increase in customer satisfaction at BIAL through AI-powered personalisation of passenger services.
- Boosted SaaS product adoption by 33% through targeted A/B testing, user analytics, and agile feature prioritisation.
- Reduced airport operational costs by 7% through strategic AI-driven insights and cross-functional process transformation.
- Scaled AI-driven SaaS analytics product to 3,000+ enterprise users at Bidgely within 15 months.

EDUCATION

Indian Institute of Technology (IIT), Ropar Minor in Artificial Intelligence	2025
IIM Visakhapatnam Post Graduate Programme (PGP) in Product Management	2025
Great Lakes Institute of Management Post Graduate Diploma in Data Science & Engineering	
Manipal Institute of Management (MAHE) PGDM in Banking & Financial Services	2015
Sikkim Manipal Institute of Technology B.Tech. in Computer Science	2014

CERTIFICATIONS

- Certified Scrum Master (CSM)
- Data Analytics and Visualization Virtual Experience | Accenture North America | Jun 2024 - Aug 2024
- Data Analytics Job Simulation | Deloitte | Jan 2025 - Feb 2025
